Pert ends his analysis after Black's 14th move saying that "the players reached a complex middlegame with mutual chances," and then "Black has stabilized his position and followed up by placing one knight on e7, supporting g6 and d5, and the other on d6." He doesn't give the concluding moves of the game or analyze any alternatives, which I think is a real shame, since to my understanding this ...

The Ragozin is an ideal system against 1. d4. Black establishes a foothold in the centre and quickly develops his pieces on active squares, with good chances for dynamic counterplay or a kingside attack. Black's opening has proven its worth at the highest level, yet the underlying ideas are simple enough to be learned without excessive memorization of variations. In this book, IM Richard Pert shares his own complete repertoire for Black after 1. d4 d5 2. c4 e6. The main subject is the Ragozin, which occurs after 3. Nf3 Nf6 4. Bb4, but the author also provides thoughtful recommendations in the related 3. Nc3 Bb4 variation, as well as against the Catalan (3. Nf3 Nf6 4. g3) and all other popular White options. Throughout the book, Pert not only checks for theoretical soundness, but also goes out of his way to avoid forced draws and other dead-equal positions, making this repertoire especially suitable for practical players who want to play for a win with Black.

The Vienna variation of the Queen's Gambit Declined is a complex and fascinating system arising after 1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 Bb4 5. Bg5 dxc4. This counterattacking weapon has become increasingly popular over the last decade and is frequently seen in games played at the highest level. Many games featuring elite players such as Garry Kasparov, Magnus Carlsen, Vladimir Kramnik, Viswanathan Anand and Lev Aronian have started out in this variation. In this QGD/Nimzo-Indian hybrid play can become extremely sharp very quickly and an in-depth knowledge of the theory is essential. Black will often grab material but will suffer from a lack of development and an exposed king. This variation will suit well-prepared players who have good tactical awareness and relish hand-to-hand combat. \* A complete theoretical survey of an important variation\* A fascinating analysis of the battle between material and the initiative\* Written by leading theoreticians

After the success of his award-winning book Keep it Simple 1. e4 International Master Christof Sielecki is back. His new repertoire based on 1. d4 has a similar profile: variations that are straightforward and easy to remember, and require little or no maintenance. Sielecki has created a reliable set of opening lines for chess players of almost all levels. The major objective is to dominate Black from the opening, by simple means. You don't need to sacrifice anything or memorize long tactical lines. His main concept is for White to play 1. d4, 2. Nf3, 3. g3, 4. Bg2, 5. 0-0 and in most cases 6. c4. Sielecki developed this repertoire while working with students who were looking for something that was easy to understand and easy to learn. This new 1. d4 repertoire may be even easier to master than his 1. e4 recommendations, because it is such a coherent system. Sielecki always clearly explains the plans and counterplans and keeps you focussed on what the position requires. Ambitious players rated 1500 or higher will get great value out of studying this extremely accessible book.

The aim of ICALT 2015 is to bring together researchers and practitioners working in industry and academia and to provide them with a platform to report on the latest developments, achievements, deployments, technology trends, and research findings as well as initiatives relative to Logistics, Transports, and their applications

Vitalizing Influence of Certain Ideas One of the greatest discoveries of modern times is the impellent energy of thought. That every idea in consciousness is energizing and carries with it an impulse to some kind of muscular activity is a comparatively new but well-settled principle of psychology. That this principle could be made to serve practical ends seems never to have occurred to anyone until within the last few years.

Grandmaster Viktor Moskalenko shakes up the lines of yet another chess opening! For those who have the Dutch Defense in their repertoire or play against it, this brings an explosive mixture of danger and opportunity. Danger if you stick to your old ways, opportunity if you are ready to take up Moskalenko's new weapons or his refutations of old ones. Moskalenko covers the Anti-Dutch, Leningrad, Stonewall and Classical variations. He guides you through this ground-breaking opening book with the enthusiasm, the ease and the humor that characterize his style. For "The Diamond Dutch" goes what chess star Vassily Ivanchuk said about Moskalenko's previous work "The Perfect Pirc-Modern": "This book will undoubtedly help you to master not just the Pirc and Modern Defences, but also to systematize and perfect your understanding of the key points of other openings."

Christof Sielecki presents a repertoire for Black against mainline 1. d4, with the Nimzo-Indian and Bogo-Indian defenses. Sielecki focuses on lines where Black adopts a dark-square strategy. This creates a system-type approach linking variations to a common theme, making the repertoire much easier to learn and understand.

Viktor Moskalenko is one of the leading chess instructors of our time. Not only has he coached Masters and Grandmasters, including Ukrainian star Vassily Ivanchuk, he has also taught hundreds of classes for amateurs and his best-selling books have inspired thousands of ambitious club players all over the world. Moskalenko's previous and highly popular chess opening books were mainly written for the Black pieces. Now he presents an extremely powerful set of lines for White. The guiding principle of his 1. d4 repertoire is: be bold and put pressure on your opponent as early as possible. Moskalenko does not shower you with long computer-generated variations, but has a keen eye for the essence of positions. His talent to find new resources in well-known lines results in a host of novelties, daring recommendations and cunning tricks. When you play his lines and follow his recommendations you will frequently surprise your opponent and build up positions full of swing. Studying An Attacking Repertoire for White with 1. d4 is a delight because this is a typical Moskalenko book: practical, accessible, original, entertaining and inspiring.

The Nimzo-Indian Defence has been one of the most trusted defenses against 1. d4 ever since its conception a century ago. It has been used in World Championship matches by Fischer, Karpov, Kasparov, Kramnik, Anand and Carlsen. The Nimzo-Indian combines fast development with a solid pawn structure and great flexibility. This book supplies an elite repertoire built upon positional principles, offering active piece play and a fight for the initiative.
