## Treatment for Diabetes

If you have type 1 diabetes, you'll need to use insulin to treat your diabetes. You take the insulin by injection or by using a pump. It's also free on prescription. If you have Type 2 diabetes, you may have to use insulin or tablets, though you might initially be able to treat your diabetes by eating well and moving more. If you have another type of diabetes, your treatment options may be different.

Treatments and management for your diabetes |  
Diabetes UK

The essential guide to Diabetes. Diagnoses of diabetes are on the rise across the UK. It is a 'chronic condition' and living with it requires an understanding of what it is and how to treat it. With good advice, some understanding of what you're eating and the effect it has on your blood sugars, as well as a healthy dose of discipline, you can find a balance between having a chronic condition and having a happy, healthy life.

The essential guide to Diabetes - Need2Know Books

In this incredibly helpful and concise book, Howard T. Joe describes a common natural food method to treat (pre)diabetes with and without medication and to lower cholesterol without medication. Using this method, he personally reduced his pre-diabetics fasting blood glucose to a good, healthy range of 90s and 100s without medication and his total fasting cholesterol from 210s to 159 and 160s.

9 essential oils for diabetes: Aromatherapy, coriander ...

Diabetes is a lifelong condition that causes a person's blood sugar level to become too high. There are 2 main types of diabetes: type 1 diabetes - where the body's immune system attacks and destroys the cells that produce insulin; type 2 diabetes - where the body does not produce enough insulin, or the body's cells do not react to insulin; Type 2 diabetes is far more common than type 1.

Regular exercise can help manage both type 1 and type 2 diabetes, and there's strong evidence that it can help control long-term blood glucose (sugar) levels in type 2 diabetes. Douglas Twenefour, deputy head of care at Diabetes UK, says, 'Exercise can lower blood glucose levels by increasing the amount of sugar used by the muscles for energy.'
